github.com/rasheed89034 | Portfolio | Peshawar, Pakistan

Profile

Artificial Intelligence undergraduate at COMSATS University with practical experience building machine learning models and deploying ML-based applications. Skilled in data preprocessing, model training, evaluation, and building interactive ML applications using Flask and Streamlit. Experienced in solving real-world classification and regression problems using Python and modern data science tools.

Education

COMSATS University Islamabad Bachelor of Science in Artificial Intelligence	<i>2024 – 2028</i> Islamabad, Pakistan
Fazaia Degree College Peshawar FSc (Pre-Engineering)	<i>2020 – 2022</i> Peshawar, Pakistan

Technical Skills

- **Programming:** Python, SQL
- **Machine Learning:** Scikit-learn, Regression, Classification, KNN, Decision Trees, Logistic Regression
- **Model Optimization:** GridSearchCV, Feature Engineering, StandardScaler, Ridge & Lasso Regularization
- **Data Science Tools:** Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook
- **Web Development:** Flask, Streamlit, HTML, CSS, MySQL
- **Tools:** Git, GitHub, MoviePy, Whisper, Gemini SDK, yt-dlp

Machine Learning & AI Projects

NeuroClip AI: Viral Shorts Generator

- Engineered an automated multimodal pipeline to transform long-form YouTube videos into viral 9:16 social media shorts.
- Integrated OpenAI's Whisper for audio-to-text transcription and Google Gemini 2.5-Flash for intelligent, automated selection of viral segments based on transcript analysis.
- Developed a video processing engine using MoviePy to handle vertical cropping, centered framing, and dynamic subtitle rendering.
- Built a comprehensive Streamlit dashboard to manage the end-to-end pipeline, from URL ingestion to asset downloading.

Audio to Text Converter

- Developed an AI-driven speech recognition application designed to transcribe audio files into editable text formats.
- Optimized processing for efficiency and deployed the tool as an interactive web application using Streamlit.

Python Code Helper (AI Assistant)

- Engineered an interactive AI assistant to provide real-time Python code generation, debugging support, and logical explanations.
- Implemented a streamlined user interface via Streamlit to assist developers in writing cleaner and more efficient code.

Breast Cancer Diagnostic Tool (ML + Streamlit)

- Developed a KNN classification model to detect malignant vs benign tumors using the Wisconsin Breast Cancer dataset.
- Trained the model using 24 medical diagnostic features achieving high prediction accuracy.
- Deployed an interactive Streamlit dashboard for real-time prediction based on patient inputs.

California Housing Price Predictor (Flask + Regression)

- Developed a Ridge Regression model to predict housing prices using California census dataset.
- Handled multicollinearity using regularization techniques for improved model stability.
- Integrated the trained model with a Flask REST API and built a simple HTML frontend.

Iris Species Predictor (Decision Tree + Streamlit)

- Built a Decision Tree classifier to identify Iris flower species based on botanical measurements.
- Optimized hyperparameters using GridSearchCV achieving 96–98% accuracy.

Magic Gamma Telescope Signal Classifier

- Implemented a logistic regression model to classify gamma-ray signals vs background radiation.
- Built a preprocessing pipeline using StandardScaler for normalization of signal attributes.

Software & Semester Projects

Underwater Object Detection and Classification (In-Progress)

- Designing a system for detecting and classifying objects in underwater environments.
- Currently working on optimizing model performance for low-visibility conditions.

Awards & Achievements

- **Regional Campus Hackathon** (May 2026): Led the “Neural Knights” team to win 3rd position out of 30 competing teams.

Certificates & Coursework

- Complete Data Science, Machine Learning, DL, NLP Bootcamp – Udemy (Krish Naik), May 2026
- 100 Days of Code: The Complete Python Pro Bootcamp – Udemy, April 2026
- Web Development Professional (1 year, 2022–2023)
- App Development Specialization (6 months, 2023–2024)

Relevant Coursework

Machine Learning, Artificial Intelligence, Data Structures, Database Systems, Probability & Statistics

Interests & Extracurriculars

- **Content Creation:** Founder of “Coding Mind244” YouTube channel, focused on AI and programming.
- **Sports:** Active player of Badminton and Swimming.
- **Interests:** Robotics Engineering, Physical Fitness, and Weight Training.
